**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 8-14, 17, 18 and 21-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Wang.

There is disclosed in Wang a bread maker, comprising: a main body 2; a base frame 7; a main frame 1 above the base frame forming an oven compartment, the main frame having a left and right frame (sidewalls 9) a rear frame (back wall) and an upper bracket (top wall); a control panel supporting frame 6; an oven 10 within the oven compartment; a heating system 12; a kneading system 11, 13, 15; a reinforcing member (front flange, figs. 3 and 7) mounted to the main frame; and an auxiliary reinforcing member (side flange, figs. 3 and 7) mounted to the main frame.

In regards to claim 18, the spot-welding of the reinforcing member to the main frame is not germane to the issue of patentability of the device itself. Therefore, this limitation has not been given patentable weight.

***Allowable Subject Matter***

Claims 2-7, 15, 16, 19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Asahina et al., Dornbush et al. and Belongia et al. are cited for their disclosure of the state of the art.
